

Participating in a psych survey in Nightingale

Arriving in Nightingale, there is an elevator easily visible.

The hallways are difficult to navigate even on the correct floor.

The correct room is found, and the study is conducted.

Exiting Nightingale, the available elevator opens only to the street on the ground floor.

CCIS Advising Appointment in Meserve

The waiting room is in the front of Meserve, right at the entrance.

The elevator is back in Meserve, in some twisting hallways.

It took ten minutes to find the elevator, even though it's only a two minute walk from the waiting room. There don't appear to be stairs.

Once on the correct floor

Finding the restroom in Holmes

There's neither a restroom nor any signs in sight, but I have directions to keep right.

After wanderin the halls for 3-5 minutes, there's stil no sign of the restroom.

A sign marks the entrance to Lake hall and points towards the restroom.

After another 5 minutes of walking back and forth in front of offices, the restroom isin an alcove.
